Full-Stack Software / Web Developer

Profile	Proficient in JavaScript, React, Ruby on Rails. Efficient with smart and responsive Front-End design, and precise at building Back-End architectures. Passionate about bridging creativity and technology.
Skills	React, Hooks/Context, Redux, JavaScript, Ruby, Ruby on Rails, HTML5/CSS3, SQL, Postgres, MVC, RESTful Architecture, Google Cloud, Google Firebase, Object Oriented Programming.
Developer Experience	<p>CRYPTOFOLIO WEB APP - Live App GitHub Repo - 2019</p> <p>Role: React and Ruby on Rails Developer</p> <p>User authenticated, cryptocurrency portfolio and tracker. Fetches real-time and historical data using async/await and back-end serializers. Front-end IU/UX with React Styled Components, state management through React Context API. Data persistence with Rails API and PostgreSQL.</p> <p>PORTFOLIO SITE - Live App GitHub Repo - 2019</p> <p>Role: React Developer</p> <p>My personal work portfolio site built from scratch with React, Styled Components, React Router, React Hooks, and Font Awesome. Fast load times, smart UI and responsive design were priorities in this project, leading to a sleek and modern interface.</p> <p>INTERVAL-TRAINING-TIMER - Live Demo GitHub Repo - 2019</p> <p>Role: React and Ruby on Rails Developer (student)</p> <p>Customizable Training Timer, built on React, Redux and Ruby on Rails. Mobile device oriented design styled with 'react-strap' and CSS3. This project solved my need for a companion workout mobile app to use on my workout routines.</p> <p>RECORDBOX REVIEWS - Live Demo GitHub Repo - 2018</p> <p>Role: Ruby on Rails Developer (student)</p> <p>User authenticated vinyl record collection manager web-app, built on Ruby on Rails, using MVC pattern, the Facebook SDK and Bcrypt. Data persistence with Google Cloud Platform and Postgres. Featured as the student highlight project of the Flatiron School Rails curriculum.</p> <p>UEFA SCHEDULES - Live Demo GitHub Repo - 2018</p> <p>Role: JavaScript and Ruby on Rails Developer (student)</p> <p>This Rails API fetches previous, future, and up-to-the-minute European soccer league data from external sources, serialized through Rails' Active Model Serializer. Front-end rendering via JavaScript/AJAX. My go-to app to check on my favorite soccer teams.</p>
Additional Experience	<p>Freelance Web Developer Business Consultant- CR Properties - New York, NY 2016 - 2020</p> <p>Audio Engineer - The Kitchen Studios - Miami, FL 2011 - 2016</p> <p>Co-Founder - PLOT Bookings - Miami, FL 2008 - 2015</p>
Education	<p>Full-Stack Software and Web Development - Flatiron School - New York, NY 2019</p> <p>Audio Technology and Engineering - SAE Institute of Technology - Miami, FL</p> <p>Finance and Business Administration - Florida International University - Miami, FL</p>
Languages	English, Spanish (Native or Bilingual Proficiency)
