FULL-STACK WEB DEVELOPER

Alejandro is a full-stack developer proficient in JavaScript, React, Redux, Ruby and Ruby on Rails. A quick learner and creative problem solver with a passing for learning, he has experience in several industries including Banking and Finance, Hospitality, and Audio Engineering, complemented with strong familiarity in Entrepreneurship and Business Development.

TECHNICAL PROJECTS

(full portfolio available at ALEJANDRO-SABOGAL.COM)

RECORDBOX REVIEWS – Try It | GitHub Repo | Demo
*This project was featured as a student project highlight on Flatiron School's Newsletter!
Maintains the user's vinyl record collection (or Recordbox) and allows interaction with other users

- **Employed** Ruby on Rails Framework to create an MVC CRUD application.
- **Provided** user authentication through Bcrypt Gem, as well as via OmniAuth-Facebook.
- **Designed** front-end with Bootstrap

INTERVAL-TRAINING-TIMER – Try It | GitHub Repo | Demo
Customizable High-Intensity-Interval-Training Timer

- **Implemented** React and Redux to render a single-page application for web and mobile
- **Augmented** functionality to POST and GET presets and user settings on a Rails back-end API
- **Styled** front-end with 'reactstrap'

UEFA SCHEDULES – Try It | GitHub Repo | Demo
Get previous, future, and up to the minute European league soccer matches

- **Consumes** a third-party API and renders data dynamically via AJAX and JSON
- **Generated** service objects to manage the third-party API responses and control the app's main logic
- **Developed** a dual application functionality application; Rails API together with HTML rendering
- **Translated** JSON responses from Rails API into JavaScript Model Objects using ES6 class syntax
